

CONDENSERS

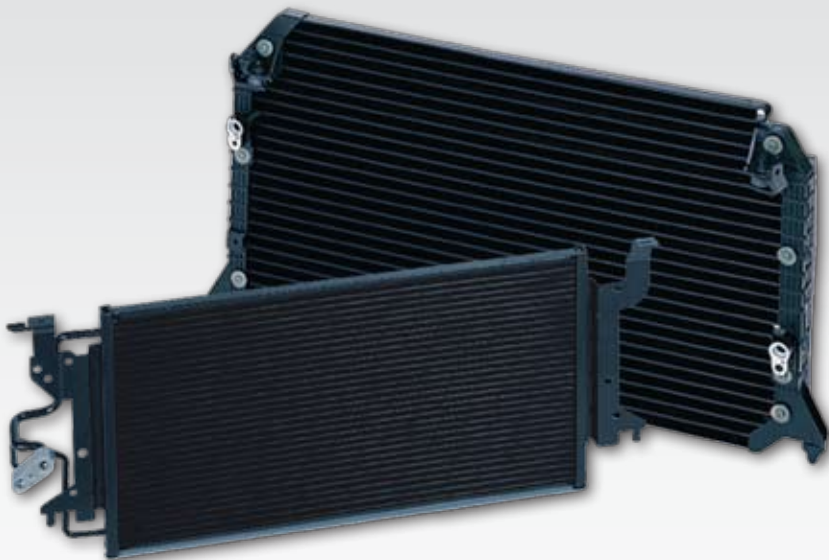

Quality and Service
You Can Count On!

► **QUALITY** ► **COMPETITIVELY PRICED** ► **SERVICE AND COVERAGE**

DISCOVER HOW TO INCREASE YOUR PROFITS AND IMPROVE YOUR CUSTOMER'S SATISFACTION

Preventing A/C cooling system problems begins with a superior quality condenser.

Our condensers are technically advanced which lengthens the life of the condenser assemblies. All condenser configurations, parallel flow, serpentine, and tube & fin, feature aluminum construction to ensure heat transfer efficiency. Its condenser aluminum tubes are extruded for utmost structural integrity. Its louvered aluminum fins and tubes are bonded through a unique furnace-brazing process with premium quality aluminum for maximum heat dissipation. Each condenser is individually pressure tested. Engineered for OE form, fit and function and meets or exceeds OEM standards.

Program Benefits

Premium Quality

Designed to OE Form, Fit, Function

Service

*24 hour rapid turn-around on orders
Technical and Marketing Assistance*

Competitively Priced

Coverage & Inventory

*Coverage for over 97% of all of
the vehicles of the road today*

Engineering

*Engineered to meet or exceed
OEM standards*
